Define connection
Start connection

chathub

Context.connectionID
.user

Connected
disconnected

Client.all
.other
.caller
.connectionID()
.allexpect(contionid)
Client.user(userID)

Client.group("pd")

Group.add(conID ,groupname)

Group.remove(conId ,groupname)

User1
[conectionid1 ,connectionid2,...]

Group name

Send to group

```
chathub
Group.add(conid ,pd)
=>add groups table , usergroups table
Group.remove()

Onconnected
Add userid ,connection id =>userconnection

Select user groups
Foreach on all user groups
Add new connection id in group
Group.add(conid ,pd)

On disconnected
Remove connectionid from userconnection
```

userid	conid
1	999
2	587
1	5645

userid	groupname

Id	SenderId	Rec id	Message	Datetime	Read	deleted
					1
